

Model: SB2T

TubBuddy + Tilt

The TubBuddy Tilt is an ergonomic bathing transfer system which carries one special feature that the original TubBuddy does not. The unit allows for safe and easy transfer over and out of the bath tub incorporating a tilt option. The tilt option allows the caregiver to relieve pressure for the patient while simultaneously making it easier to bathe the patient. The tilt option alleviates caregiver strain by allowing the patient to slide over the bath tub without having to lift their legs.
